

Lift Station Belleville, IL

Products

Raven 760 HPPC
Raven 171 FS Primer at 5-10mil DFT
Raven 405 at 125mil

Description of Application

A newly-poured concrete lift station, 20' x 20' x 25' deep well, with approximately 3500 sq. ft. walls/floor/ceiling, which received the 405 lining system. New concrete was abrasive blasted to an ICRI CSP 5. Raven 760 was sprayed via mortar pump at 1/8" & back-troweled to resurface bug holes and surface imperfections, one coat Raven 171 FS at 5-10 mils DFT & 125 mils Raven 405 as a finish coat.
