Raven AquataPoxy® 30 Years and Counting
Long Standing Brand Expands with New Products

Broken Arrow, OK –As Raven Lining Systems is set to celebrate their 30th anniversary in 2018, the company is proud to introduce the newest additions to the AquataPoxy® brand, the **AquataPoxy 90** (epoxy lining) and **AquataPoxy 190** (red oxide epoxy primer/finish coating). These products will supplement Raven’s existing portfolios (AquataPoxy and AquataFlex®) for the potable water market.

The AquataPoxy brand has been around for over 30 years, delivering superior and environmentally safe long-term corrosion prevention for potable water infrastructures. The success of this Raven brand has spanned applications from storage tanks, water treatment plants, aquariums, and tunnels to the locks on the Panama Canal.

“What makes these products unique to this industry is they were designed to be some of the cleanest and safest protective linings on the market today,” states Tripp Ishmael, Raven VP, Research & Development. “Raven’s products are some of the most trusted in the industry due to the rigorous NSF/ANSI 61 testing for certification purposes.”

NSF/ANSI 61 certification demonstrates the safety criteria for drinking water has been met by these products. This includes a fast return-to-service in as little as 72 hours.

Additional benefits of these products include:

AquataPoxy 90

1. Fast curing direct to metal anti-corrosive epoxy coating
2. Standalone coating, which also can be used as an excellent surface tolerant primer for a wide variety of topcoats
3. VOC’s <100 g/L (as supplied), which meet California air quality requirements
4. Approved for minimum size tanks >25 gallons and pipes >10 inches

AquataPoxy 190

1. Fast curing blast holding direct to metal primer or standalone finish coat epoxy
2. VOC's <166 g/L (as supplied) which meet California air quality requirements
3. Approved for minimum size tanks >5 gallons and pipes >4 inches

About Raven Lining Systems
